

Environmental and Sustainability policy

Environmental and sustainability policy for DB FAST

Our sustainability vision

DB FAST aims to be a responsible and sustainable partner within technical consultancy, project management, technical property management and contracting services. Through sustainable solutions, technical expertise and active environmental responsibility, we create value for our customers while contributing to a more sustainable future.

Our sustainability principles

Energy and resource efficiency

We work continuously to reduce energy consumption, resource usage and environmental impact in our own operations as well as in the projects and contracts we deliver. Through efficient methods and responsible use of materials, we contribute to sustainable development.

Sustainable technical solutions

We promote, design and implement technical solutions that contribute to reduced energy consumption, lower emissions and improved long-term performance of buildings and facilities. Where possible, we prioritize reuse, circular solutions and materials with reduced environmental impact.

Responsible procurement and suppliers

We cooperate with suppliers, subcontractors and business partners who share our commitment to sustainability, quality, environmental responsibility and ethical business practices. We promote responsible procurement and sustainable supply chains.

Climate impact reduction

We actively work to reduce our carbon footprint through efficient planning, coordinated transportation, digital meetings and sustainable working methods. We continuously monitor and improve our environmental performance.

Sustainable contracting

In our contracting activities, we consider environmental aspects throughout planning and execution. We work to minimize waste, promote recycling and ensure responsible handling of materials and resources.

Social responsibility

We strive to create an inclusive and respectful workplace where diversity, equal opportunities and good working conditions are valued. We take responsibility for our employees, partners and the communities in which we operate.

Sustainability awareness and continuous development

We invest in knowledge, training and awareness to ensure that sustainability is integrated into our company culture. Through continuous improvement, we develop our services and working methods to create positive environmental and social impact.

Our commitment

DB FAST complies with applicable environmental legislation and relevant requirements. We continuously work to reduce our environmental impact and create sustainable solutions throughout the entire project lifecycle – from consultancy and design to implementation, operation and maintenance.
