

Quality policy

Quality policy for DB FAST

Our commitment

DB FAST is committed to delivering high-quality technical consultancy services, project management, technical property management and contracting services with professionalism, reliability and business integrity. Our goal is to create long-term value for our clients through solutions that meet or exceed their expectations.

Our quality principles

Customer Focus

We place our customers at the centre of everything we do. By understanding their needs, objectives and challenges, we deliver tailored solutions that create long-term value and sustainable results.

Competence and professionalism

We ensure that our employees and partners have the necessary expertise and experience to deliver high-quality services. Through continuous training, knowledge sharing and professional development, we continuously strengthen our competence and working methods.

Quality throughout every project

We work systematically with planning, quality assurance, follow-up and improvement throughout the entire project lifecycle – from consultancy and design to implementation, contracting, handover and evaluation. Deviations are identified, managed and followed up to ensure a high-quality delivery.

Innovation and sustainable solutions

We develop and recommend technical solutions that are functional, cost-effective and sustainable over time. We encourage innovation and continuous improvement in our services, processes and project execution.

Communication and collaboration

We believe that transparent communication and close cooperation are key factors for successful projects. We work closely with customers, suppliers, subcontractors and other stakeholders to achieve efficient deliveries and long-term partnerships.

Continuous improvement

We continuously evaluate our processes, projects and results. Feedback from customers, employees and partners is actively used to improve our operations and enhance the quality of our services.

Compliance with requirements

We comply with applicable legislation, regulations, contractual requirements and industry standards. Through structured quality management, we ensure reliable deliveries and continuous development of our business.

Our vision

DB FAST aims to be a trusted and long-term partner within technical consultancy, project management, technical property management and contracting services. Through quality, technical expertise and strong customer focus, we create sustainable solutions and lasting business relationships.
